

In the Specification:

Page 18, line 16-18 of the Specification states that, "The agent mixing chamber 324 or 324a is preferably removable and replaceable from the dechlorination device, and may be removed without removing the dechlorination device from the fluid flow path." The agent mixing chamber is removable and replaceable through an access cap. As the access cap is indicated to in the specification portion stated above and claims 3, 4, and 8. It does not constitute new matter.
